

RustPrufe Permanent

Same Wheel Loader after operating in a fertiliser facility for six months

Coated versus non-coated steel bolts

Coated versus non-coated steel bracket

Rust Prufe is a clear one part, co-polymer acrylic coating, which is water based and environmentally friendly.

The product is used as a heavy duty protection, to prevent rust and corrosion on earthmoving and industrial equipment, operating in highly acidic and corrosive environments.

Rust Prufe has been formulated with a high quality flash rust inhibitor.

Product Benefits

- Highly acid resistant
- UV stable
- Crystal clear finish - allows application directly over existing colour of equipment.
- Clear finish allows simple visual inspection of coated surfaces
- Extremely flexible - Anti Crack
- Minimal surface preparation required
- Can be applied onto painted or bare metal surfaces

RUST PRUFE
Protect any steel from rust and corrosion
